ROUTES

Reducing Opportunities for the Unlawful Transport of Endangered Species

The ROUTES Partnership, supported by USAID is assisting the private sector to respond to the international poaching crisis by targeting how organized criminals move contraband from source to end-use markets.

The **goal of this partnership** is to disrupt wildlife trafficking by reducing the use of legal transportation supply chains

Reducing Opportunities for Unlawful Transport of Endangered Species

Training Objectives

Module 1 – Wildlife trafficking overview

At the end of this, you will:

- Understand the risks posed by wildlife traffickers to legal transport supply chains
- Understand why wildlife is traded
- Understand that there are laws and regulations which govern the trade in wildlife
- Understand the magnitude and impacts of the illegal wildlife trade

Why are you here?

Reputation

Legal

Economic

Safety

Reputation

Media reports
may give airline
name, flight
number or
suggest staff
involvement

Legal

Risk of
prosecution for
failing to ensure
cargo is legal

Economic

Increased
scrutiny leads to
lost business,
possible cost of
repatriation

Safety

Risk of injury
and spread of
disease from
smuggled
wildlife

International regulation

CITES

The Convention on International Trade in
Endangered Species of Wild Fauna and Flora

Aims to ensure that international trade does not threaten
the survival of wild animals and plants.

Signed by more than 180 countries

CITES - 35,000 species of plants and animals

Appendix I

At risk of extinction
from international trade

Appendix II

May become
threatened with
extinction if trade is not
controlled

Appendix III

Protected in one
country which asked
others to help control
the trade

Refer to your national CITES Management Authority if you need more information
